

Intro to Social Science Data Analysis

Seminar 6: Data Visualisation in R

Christopher Gandrud

October 2, 2012

Principles of Graphical Excellence

What does it mean to “show the data”?

What is a high data-ink ratio?

Bubbles!

Why should you use circles in statistical graphics cautiously?

Base R Graphics

Make a graph in base R (using any data).

Make sure the figure is labeled well.

ggplot2

With ggplot2 make:

- ▶ A scatter plot,
- ▶ A density plot
- ▶ A line graph
- ▶ A bar graph

Use colour to show groups in your data in at least one of these graphs.

ggplot2

With ggplot2 make:

- ▶ A scatter plot,
- ▶ A density plot
- ▶ A line graph
- ▶ A bar graph

Use colour to show groups in your data in at least one of these graphs.

ggplot2

With ggplot2 make:

- ▶ A scatter plot,
- ▶ A density plot
- ▶ A line graph
- ▶ A bar graph

Use colour to show groups in your data in at least one of these graphs.

With ggplot2 make:

- ▶ A scatter plot,
- ▶ A density plot
- ▶ A line graph
- ▶ A bar graph

Use colour to show groups in your data in at least one of these graphs.

Maps

Make a map with googleVis,
